

LS-208

LS-208

MILITARY MOBILE CELLULAR COMMUNICATION HOLDER

The **LS-208** is a Military mobile cellular communication holder providing hands free functionality with maintained sound quality for tactical vehicles. This is a hands free unit which reduces noise and echo that transmitters usually distribute.

It also contains a Mil Handset **H-189** to enable private conversation, not through the speaker. When not in use, handset is fully mounted and firmly held onto holder. This holder enables both an external connection to a Mil microphone through **U-229** connector, and serial port through 9-pin Mil connector.

The **LS-208** can be mounted in any tactical vehicle and is protected against vibrations and RFI interference. It is housed in a dye-cast metal enclosure and is resistant to weather, water immersion, humidity, temperature extremes, vibrations and bounce. It is intended for use with ground, airborne and seaborne service.

Characteristics:

Frequency Range:
300 Hz-3500 Hz.

Power Rating:
5 Watts RMS (nominal)
and 8 Watts RMS to peak.

Temperature operation:
-30 to +70 C

Dimensions:
240mm x 140mm x 60mm

Net weight:
About 2 Kg.
