

TELEPHONE TIME COUNTER

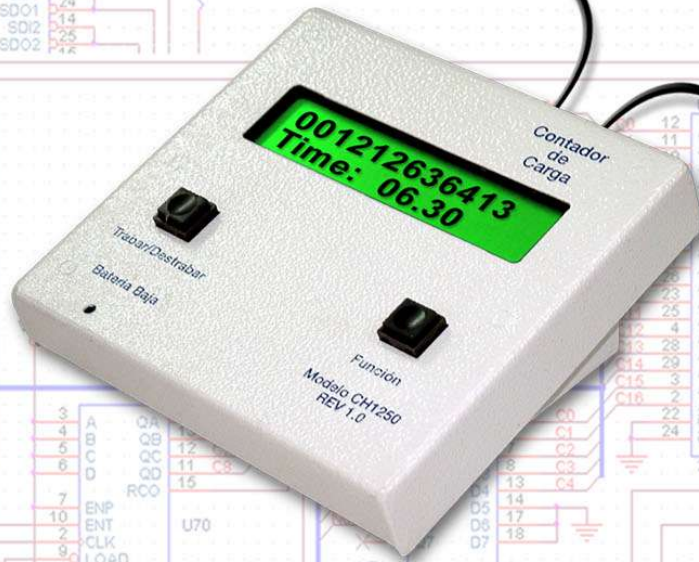

Telephone Time Counter

The TA-7070 Telephone Time Counter is activated by the PTT exchange. It is connected via the telephone line to any phone using DTMF dialing method. It uses 12-16 KHz pulse, or polarity reverse, or a timer. Its purpose is to detect the time for each call and the phone number which was dialed. This is shown on the large-character LCD display showing 16 x 2 digits very clearly.

The counter shows the number of pulses for each call or for call time. Accumulating pulses are shown at the right side of the LCD, and current pulses or current call time are shown on the left side, having Automatic Lock for next dialling and release. It also shows the phone number which was dialed.

After each call the counter will be reset to zero by pushing the " Lock/ Unlock " button.

The TA-7070 Telephone Time Counter is operated by a standart 9V 0.3A DC adaptor and is connected to the telephone line and telephone by an 2 RJ-11 connectors.
